With the Fall 1992 issue, *COMSAT Technical Review* (CTR) completed its twenty-second year of publication. This index has been compiled to aid readers in locating specific papers based on subject matter, author name, or date of publication.

**Subject Index** groups papers chronologically by subject matter, based on index terms assigned to each paper . . . . . **I**

**Author Index** lists all papers alphabetically by the primary author, with cross reference to COMSAT coauthors . . . . . **83**

**Chronological Index** lists papers relative to the volume, number, and date of the journal issue in which they appeared . . . . **115**

Each article has been assigned a reprint number (*e.g.*, CTR71/001), which may be used in ordering a copy of the paper. There is a charge of \$3 (U.S.) for each reprint. Single copies of a given issue are available for \$15. Checks should be made payable to COMSAT, and requests should be directed to:

# **Subject Index**

In this index, papers are grouped based on subject matter, in the categories given below. Within each category, papers are listed in chronological order. The reprint number in brackets following each citation is to be used when ordering copies of the paper, as explained on p. iii.

Amplifiers	Frequency Reuse	Receivers
Antennas	Geosynchronous Orbit	Reliability
Attitude Control	In-Orbit Testing	Simulation
Batteries	Integrated Circuits/MMICs	Small Terminals
Beacons	INTELSAT	Software
Beam Scanning	Interference	Solar Cells
Broadcast Satellites	Intersatellite Links	Solid-State Devices
Celestial Mechanics	Low Noise	SPADE
Coding	MARISAT	Speech Processing
Computer Communications	Mobile Communications	Structures
COMSTAR	Models	Subjective Evaluation
Cryptography	Modulation, Demodulation,	Synchronization
Data Collection	Modems	Systems Monitoring
Digital Transmission	Multiplexing	Telemetry, Tracking & Command
Diodes	Networks	Telephone Transmission
Distortion	Onboard Processing	Television
Diversity	Optical Communication	Thermal Control
Earth Stations	Oscillators	Time-Division Multiple Access
Echo Control	Performance Specifications	Traffic Statistics
Environmental Effects	Polarization	Transmission
Error Control	Propagation	Transmitters
Filters	Propulsion	Transponders
Frequency Allocation	Protocols	
Frequency Converters	Radiation
